Numeral string
9.11; 1/2
5e-1; 50%
Tokenization
Frequency-based subword segments
Embeddings
Categorical token vectors
Position + attention
Column alignment
Carry propagation
Decoding
Left-to-right answer generation
RG failure channel
Inconsistent segmentation
RG failure channel
Unconstrained value geometry
PG failure channel
Position shift breaks alignment
PG failure channel
Output order vs. arithmetic order
RG: surface form to value | PG: arithmetic procedure
